

Dear Friends,

SUU is a remarkable place. From its heroic founding in 1897 through its growth and maturity that have brought us forward, you will find an outstanding environment for learning and personal development. The faculty and staff of the university are committed to an uncommon level of excellence and personal service. Academic programs are of high quality and provide outstanding preparatory opportunities for lives and careers. A splendid array of extracurricular activities brings exciting chances for personal involvement and leadership development.

Southern Utah University is a comprehensive, regional university providing baccalaureate, applied technology and selected graduate education. Our vision is that “Southern Utah University will be nationally recognized as a premier regional university where exemplary faculty and staff, personalized learning and academic integrity, enable students and graduates to honor thought in all its finest forms and to excel in life.” In 2004, Consumers Digest named Southern Utah University in the top ten of public colleges in the nation in terms of both quality and economic value. The Princeton Review also named SUU among the best colleges and universities in the west the past two years.

These national honors come because of the highly qualified faculty and staff who serve our students. In addition, top leaders, educators and experts frequently come to SUU to share their expertise with our students and campus community. Students flourish in this dynamic environment. We invite you to further consider the benefits of an SUU educational experience. We are anxious to serve students well and we invite your inquiries.

Warm regards,

*Steven D. Bennion, President  
Southern Utah University*
