

## NSSE 2019 Administration Summary

Southern Utah University

This page intentionally left blank.

### NSSE 2019 Administration Summary Southern Utah University

#### **Administration Summary**

This report provides an overview of your NSSE administration, including details about your population and sample, response rates, representativeness of your respondents, survey customization choices, and recruitment message schedule. This information can be useful for assessing data quality and planning future NSSE administrations.

#### **Population and Respondents**

The table at right reports your institution's population sizes, how many students were sampled (whether census-administered or randomly selected), and how many completed the survey.

| Survey completions               | First-year | Senior |
|----------------------------------|------------|--------|
| Submitted population             | 2,438      | 1,782  |
| Adjusted population <sup>a</sup> | 2,430      | 1,776  |
| Survey sample <sup>b</sup>       | 2,423      | 1,771  |
| Total respondents <sup>b</sup>   | 742        | 647    |
| Full completions <sup>c</sup>    | 612        | 584    |
| Partial completions              | 130        | 63     |

- a. Adjusted for ineligible students and those for whom survey requests were returned as undeliverable.
- Number of census or randomly sampled students invited to complete the survey. Targeted, experimental, and locally administered samples not included.
- c. Submitted demographic and (if applicable) Topical Module sets.

#### **Response Rate and Sampling Error**<sup>a</sup>

The table below summarizes response rates and sampling errors for your institution and comparison groups. For more information see NSSE's Response Rate FAQ: nsse.indiana.edu/links/RRFAQ

|                             |          | First         | t-year         |             |          | Se            | enior          |             |
|-----------------------------|----------|---------------|----------------|-------------|----------|---------------|----------------|-------------|
|                             |          | Public 5001 - |                | NSSE 2018 & |          | Public 5001 - |                | NSSE 2018 & |
|                             | SUU      | 10000         | Western Region | 2019        | SUU      | 10000         | Western Region | 2019        |
| Response rate               | 31%      | 22%           | 16%            | 23%         | 37%      | 23%           | 20%            | 23%         |
| Sampling error <sup>b</sup> | +/- 3.0% | +/- 0.5%      | +/- 1.5%       | +/- 0.2%    | +/- 3.1% | +/- 0.5%      | +/- 1.2%       | +/- 0.2%    |

a. Comparison group response rate and sampling error were computed at the student level (i.e., they are not institution averages) for all respondents.

#### Representativeness and Weighting

The first table at right details variables submitted in your population file. Respondent and population percentages are listed side by side as a convenience to see how well the characteristics of your respondents reflect your first-year and senior populations. For detailed characteristics of the respondents in your reports, refer to your *Respondent Profile*.

NSSE data files include weights by institution-reported sex and enrollment status so institutional estimates reflect the population with respect to these characteristics. The second table at right provides the respondent and population proportions used to calculate your weights. For more information, see nsse.indiana.edu/links/weights

| resentativeness                 | First-       | First-year   |              | Senior       |  |
|---------------------------------|--------------|--------------|--------------|--------------|--|
|                                 | Respondent % | Population % | Respondent % | Population 9 |  |
| Female                          | 72           | 61           | 57           | 50           |  |
| Full-time                       | 98           | 96           | 90           | 85           |  |
| First-time, first-year          | 85           | 78           | N/A          | N/A          |  |
| Race/ethnicity <sup>a</sup>     |              |              |              |              |  |
| Am. Indian or Alaska Native     |              |              |              |              |  |
| Asian                           |              |              |              |              |  |
| Black or African American       |              |              |              |              |  |
| Hispanic or Latino              |              |              |              |              |  |
| Native Hawaiian/Other Pac. Isl. |              |              |              |              |  |
| White                           |              |              |              |              |  |
| Other                           |              |              |              |              |  |
| Foreign or nonresident          |              |              |              |              |  |
| Two or more races/ethnicities   |              |              |              |              |  |
| Unknown                         |              |              |              |              |  |

a. Based on the IPEDS categories submitted in the population file. Results for institutions without full (at least 90%) race/ethnicity information in the population file are not reported.

| ighting <sup>a</sup> | First-       | year         | Senior       |              |
|----------------------|--------------|--------------|--------------|--------------|
|                      | Respondent % | Population % | Respondent % | Population % |
| Full-time, female    | 70           | 59           | 51           | 44           |
| Full-time, male      | 28           | 37           | 39           | 42           |
| Part-time, female    | 1            | 2            | 6            | 7            |
| Part-time, male      | 1            | 2            | 4            | 8            |

b. Also called "margin of error," sampling error is an estimate of the amount a score based on a sample could differ from the true score on a given item. For example, if the sampling error is +/- 5.0% and 40% of your students replied "Very often" to a particular item, then the true population value is most likely between 35% and 45%.

#### **NSSE 2019 Administration Summary**

#### **Southern Utah University**

#### **Population File**

Your institution provided a population file for survey administration and was afforded an opportunity to update it.

#### Population file options

| Included "group" variable(s) <sup>a</sup>            | No | Identified students who completed BCSSE 2018 <sup>d</sup> | N/A |
|--|----|---|-----|
| Identified an oversample <sup>b</sup>                | No | Customized the report sample <sup>e</sup>                 | No  |
| Updated to identify ineligible students <sup>c</sup> | No |   |     |

- a. Institutions had the option to include additional variables in the population file for oversampling or for post hoc analyses. Up to five group variables were allowed. If formatting specifications were met, Group 1 can be used in the Report Builder.
- b. Institutions that did not census-administer to first-year and senior students had the option to oversample a segment of their population. Oversamples may also be used to survey students in other class years.
- c. Institutions had the option to update their population files to identify students who did not return to campus in the spring or otherwise did not meet NSSE eligibility criteria.
- d. Institutions that participated in the Beginning College Survey of Student Engagement (BCSSE) can identify BCSSE survey respondents in their NSSE population file. This information is required to receive the longitudinal results in the BCSSE-NSSE Combined Report.
- e. Institutions had the option to flag a subset of students for exclusion from reports, but all sample members were invited to complete the survey.

#### **Survey Options**

The options at right were available to customize the content of your NSSE survey and to collect complementary data from companion surveys.

#### Administration features

| Survey sample type              | Census       |
|---------------------------------|--------------|
| Recruitment method              | Email        |
| Portal/LMS used <sup>a</sup>    | No           |
| Incentive offered               | Yes          |
| Survey version                  | U.S. English |
| Institution logo used in survey | Yes          |
| Mobile respondents <sup>b</sup> | 865, 62%     |

#### Additional question sets and companion surveys

| Topical module(s) | Writing Experiences, Information Literacy |
|-------------------|---|
| Consortium        | None                                      |
| BCSSE 2018        | No  |
| FSSE 2019         | No  |

- a. Institutions that used their student portal or learning management system to recruit students are indicated by "Yes" followed by the number and percentage of respondents who used posted survey links.
- b. Number and percentage of students who responded with a smartphone or tablet. See the "operating system" variables in your SPSS data file for additional details.

#### **Recruitment Messages**

Students received up to five direct contacts. Your institution had the option to customize message content and timing.

#### Message schedule

| Message schedule |            | Cumulative res | oonse rate |  |
|------------------|------------|----------------|------------|--|
|                  | Date       | First-year     | Senior     |  |
| Invitation       | 02/14/2019 | 6%             | 9%         |  |
| Reminder 1       | 02/26/2019 | 13%            | 16%        |  |
| Reminder 2       | 03/20/2019 | 19%            | 22%        |  |
| Reminder 3       | 03/26/2019 | 26%            | 29%        |  |
| Final reminder   | 04/10/2019 | 31%            | 37%        |  |

#### **Report Customization**

Your institution had the option to customize the comparison groups used in reports. The group selected for the Snapshot comparisons is identified with an asterisk.

#### Comparison groups for NSSE core survey reports

| Group 1 | Public 5001 - 10000* (customized, N=93) |
|---------|---|
| Group 2 | Western Region (customized, N=15)       |
| Group 3 | NSSE 2018 & 2019 (default, N=812)       |

#### Comparison groups for additional question set report(s)

| Topical Module: Writing Experiences  | Writing Experiences (default, N=71)  |
|--------------------------------------|--------------------------------------|
| Topical Module: Information Literacy | Information Literacy (default, N=39) |

# NSSE 2019 Selected Comparison Groups

Southern Utah University

#### **NSSE 2019 Selected Comparison Groups**

#### **About This Report**

#### **Comparison Groups**

The NSSE *Institutional Report* displays core survey results for your students alongside those of three comparison groups. In May, your institution was invited to customize these groups via a form on the Institution Interface. This report summarizes how your comparison groups were constructed and lists the institutions within them.

NSSE comparison groups may be customized by (a) identifying specific institutions from the list of all 2018 and 2019 NSSE participants, (b) composing the group by selecting institutional characteristics, or (c) a combination of these. Institutions that chose not to customize received default groups<sup>a</sup> that provide relevant comparisons for most institutions.

Institutions that appended additional question sets in the form of Topical Modules or through consortium participation were also invited to customize comparison groups for those reports. The default for those groups was all other 2018 and 2019 institutions where the questions were administered. Please note: Comparison group details for Topical Module and consortium reports are documented separately in those reports.

#### Your Students' Comparison Comparison Comparison Responses Group 1 Group 2 Group 3 Report Comparisons Comparison groups are located in the institutional reports as illustrated in the mock **First-Year Students Frequency Distributions** report at right. In this Admissions Carnegie UG NSSE NSSEville State Program Cohort example, the three Overlap groups are "Admissions Item wording Overlap," "Carnegie 1. During the current school year, about how often have you done the following? UG Program," and a. Asked questions or askquest 1 Never 45 1.462 16 3.978 "NSSE Cohort." contributed to course 450 37 15,00 Sometimes 6,910 43,752 33 discussions in other Often 428 34 11 .51 5,911 34 35 34 47,737 ways

Very often

#### **Reading This Report**

This report consists of three sections that provide details for each of your comparison groups, illustrated at right.

#### **Comparison Group Name**

The name assigned to the comparison group is listed here.

#### **How Group was Constructed**

Indicates whether your group was drawn from a list, built based on criteria, or is the default group. If institutional characteristics were used to build your comparison group, they are listed here.

#### **Institution List**

The names, cities and states or provinces of the comparison institutions are listed for your reference. NSSE 2018 participants are identified with an asterisk.

#### Comparison Group 1: Admissions Overlap

Your institution customized this comparison group by selecting from the list of all NSSE participants.

comparison group
constructed?

Group description
[as provided by
your institution]

All other current: and prior-year participants with the same Carnegie Classification and sector in our region.

Admissions Overlap (N=20)

American International College (Springland, 164,
American Scollege (State), MA)

Bryant University (Smithfield, EU)

Chonglinic College (Smithfield, EU)

College of Our Lody of the Elmi (Chicepes, MA)

Cury College (Ohlor, MA)\*

Frenklin Fairer University (Smithe, NA)

Comparison Group 1: For institutions not in a NSSE consortium, this group contains 2018 and 2019 NSSE institutions in the same geographic region and sector (public/private). For consortium institutions, it contains results for the other 2018 (if applicable) and 2019 consortium members.

Comparison Group 2: All other 2018 and 2019 U.S. NSSE institutions sharing your institution's Basic Carnegie Classification. (Canadian institutions are not classified by the Carnegie Foundation, and must identify a comparison group.)

Comparison Group 3: All other 2018 and 2019 U.S. NSSE institutions (2018 and 2019 Canadian participants are also included in this group for Canadian institutions).

a. The default groups are:

#### Comparison Group 1: Public 5001 - 10000

This section summarizes how this group was identified, including selection criteria and whether the default group was used. This is followed by the resulting list of institutions in this group.

| Date submitted                    | 5/2/19   |
|-----------------------------------|--|
| How was this comparison group     | Your institution customized this group by selecting institutional characteristics as follows:          |
| constructed?                      | Sector (Pub); UG Enrollment (5-10K)  |
| Group description                 | This includes all NSSE 2018/2019 public institutions with an undergraduate enrollment of 5001 - 10000. |

## NSSE 2019 Frequencies and Statistical Comparisons

Southern Utah University

**Please note:** The layout of this file is optimized for printing and PDF creation, not on-screen viewing. When the Excel version is viewed on screen, some cells appear to contain truncated text or misplaced line breaks. This is due to differences in Excel between on-screen display and what appears in print or PDF.

### NSSE 2019 Frequencies and Statistical Comparisons About This Report

The Frequencies and Statistical Comparisons report presents item-by-item student responses and statistical comparisons that allow you to examine patterns of similarity and difference between your students and those at your comparison group institutions. The report uses information from all randomly selected or census-administered students. The display below highlights important details in the report to keep in mind when interpreting your results. For more information please visit our website (nsse.indiana.edu) or contact a member of the NSSE team.

- 1. Class level: As reported by your institution.
- Item numbers: Numbering corresponds to the survey facsimile included in your Institutional Report and available on the NSSE website.
- Item wording and variable names: Survey items are in the same order and wording as they appear on the instrument.
   Variable names are included for easy reference to your data file and codebook.
- Values and response options: Values are used to calculate means.
   Response options are worded as they appear on the instrument.
- Count and column percentage (%): The Count column contains the number of students who selected the corresponding response option. The column percentage is the weighted percentage of students selecting the corresponding response option.

**Note:** Column percentages and statistics are weighted by institution-reported sex and enrollment status. Comparison group statistics are also weighted by institutional size. Counts are unweighted and cannot be used to replicate column percentages. For details visit:

nsse.indiana.edu/links/weights

6. **Statistical comparisons:** Items with mean differences that are larger than would be expected by chance are noted with asterisks referring to three significance levels (\*p < .05, \*\*p < .01, \*\*\*p < .001). Significance levels indicate the probability that an observed difference is due to chance. Statistical significance does not guarantee the result is substantive or important. Large sample sizes tend to generate more statistically significant results even though the magnitude of mean differences may be inconsequential. Consult effect sizes (see #7) to judge the practical meaning of differences. Unless otherwise noted, statistical comparisons are two-tailed independent t-tests. Exceptions are items 11 a-f which are compared using a z-test.

- 7. **Effect size:** Effect size indicates practical significance. An effect size of .2 is often considered small, .5 moderate, and .8 large. A positive effect size indicates that your institution's mean was greater than that of the comparison group, thus showing a favorable result for your institution. A negative effect size indicates your institution lags behind the comparison group, suggesting that the student behavior or institutional practice represented by the item may warrant attention. Effect sizes for independent *t*-tests use Cohen's *d*; *z*-tests use Cohen's *h*. Cohen's *d* is calculated by dividing the mean difference by the pooled standard deviation. Cohen's *h* is calculated by taking the difference in the proportion of students who responded "Done or in progress" after the proportion has been transformed using a non-linear (arcsine) transformation. See: Cohen, J. (1988). Statistical power analysis for the behavioral sciences (2nd edition). New York: Psychology Press.
- 8. Key to symbols:

Your students' average was significantly higher ( $p \le .05$ ) with an effect size at least .3 in magnitude.

Your students' average was significantly higher (p < .05) with an effect size less than .3 in magnitude.

**Vour students' average** was significantly lower (p < .05) with an effect size less than .3 in magnitude.

**Your students' average** was significantly lower (p < .05) with an effect size at least .3 in magnitude.

Note: It is important to interpret the direction of differences relative to item wording and your institutional context.

#### **Endnotes**

- a. Column percentages are weighted by institution-reported sex and enrollment status (and institution size for comparison groups). Percentages may not sum to 100 due to rounding. Counts are unweighted; column percentages cannot be replicated from counts.
- b. All statistics are weighted by institution-reported sex and enrollment status (and institution size for comparison groups). Means calculated from ordered response options (e.g., Very often, Often, Sometimes, Never) assume equal intervals and should be interpreted with caution. Unless otherwise noted, statistical comparisons are two-tailed independent *t*-tests. Exceptions are the dichotomous High-Impact Practice items (11a to 11f) which are compared using a *z*-test.
- c. Items which make up the Engagement Indicators include the following two-letter prefixes: CL = Collaborative Learning, DD = Discussions with Diverse Others, ET = Effective Teaching Practices, HO = Higher-Order Learning, LS = Learning Strategies, QI = Quality of Interactions, QR = Quantitative Reasoning, RI = Reflective & Integrative Learning, SE = Supportive Environment, and SF = Student-Faculty Interaction.
- d. These are the values used to calculate means. For the majority of items, these values match the codes in the data file and codebook. For items estimating number of papers and hours per week, the values represent actual units using the midpoints of response option ranges and an estimate for unbounded options.
- e. Effect size for independent t-tests uses Cohen's d; z-tests use Cohen's h. See page 2 for more details.
- f. Statistical comparison uses z-test to compare the percentage who responded "Done or in progress" or "Yes."
- g. Statistics are weighted by institution-reported sex and enrollment status (and institution size for comparison groups).
- h. Standard error of the mean for ordered and continuous variables; standard error of the proportion for items indicating "Done or in progress" (High-Impact Practices). The 95% confidence interval is equal to the sample mean plus or minus 1.96 times the standard error of the mean.
- i. A measure of the amount individual scores deviate from the mean of all the scores in the distribution.
- j. Degrees of freedom used to compute the t-tests. Values differ from Ns due to weighting and whether equal variances were assumed.
- k. Statistical comparisons are two-tailed independent t-tests or z-tests. Statistical significance represents the probability that the difference between your students' mean and that of the comparison group is due to chance.
- 1. Mean represents the proportion who responded "Done or in progress" or "Yes."
