

Earth Club Meeting Notes
January 29, 2010

Semester ideas we are most interested in:

1. Informative presentations/activities for students and faculty on campus to get people educated and excited about reducing, reusing, and recycling. Perhaps starting with recycling and building towards reducing/reusing as the semester progresses and people start to change their habits.
2. Cleaning up the canyons - perhaps plan for spring?
3. Earth Club Movie Night(s) - look into having SUUSA foot the bill or look into educational copyright law to see if we can get the rights for a reduced fee. Movie ideas: Disney's Earth, Nova's Planet Earth series, Once Upon a Forest, FernGully: The Last Rainforest, etc.
4. Making Earth Day a big success! Activities on multiple quads? Be thinking of ideas!

For next week's meeting:

- Come with specific plans for informative activities (include where and when).
- Bring \$10 for Earth Club T-shirts so we can get more recycling bins on campus!
- Bring how-to information about recycling. Do some research so we can put together a list of essentials to share with people.
