True/False Exams

1. Read the directions for the exam BEFORE you begin.

2. Determine the number of questions and budget your time.
   Many times when True/False questions are given there are a large number of
   questions. If so, answer each question quickly. It may not be worth a lot of time to get
   one question right if the question is only worth two points on a 100 point test.

3. Read each question carefully.
   Remember that if any part of a statement is false, the entire state is false. Most
   questions contain a combination of who, what, when, where or how facts. If any one
   of those facts is wrong, the statement is false.

4. Look for qualifiers.
   Words like never, all, none, only and always generally indicate a statement is false.
   On the other hand, sometimes, generally, often, frequently, and mostly indicate a
   statement is true.

5. Answer the questions you know first.
   Often answers to questions you don't know are supplied in other questions. Go back
   to answer the difficult questions later.

6. When guessing, do not change answers.
   Research indicates your first answer is usually best. However, don't be afraid to
   change answers when you have a good reason for doing so.

7. Answer all questions.
   Unless points are deducted for incorrect responses, leave enough time to answer all
   questions. Mark all remaining or unfinished questions true; in a true/false exam a
   slight majority of the answers are usually true.

8. "Reason" statements tend to be false.
   When something is given as the "reason" or "cause" or "because" of something else
   the statement will tend to be false.
