

Roof Access Procedure

For safety and security reasons, roof access at SUU must be strictly controlled. All Southern Utah University personnel are required to receive authorization from Facilities Management for access to roof areas, using the following process:

1. SUU Personnel must be accompanied by an authorized Facilities Management staff member.
2. Persons desiring roof access must obtain roof access authorization from the Director of Safety and Risk Management 48 hours prior to scheduling the proposed event.
3. Facilities Management will review roof access requests and will grant permission for access if it is deemed justified.
4. If the requested use is approved, roof access will be arranged, scheduled, and accompanied by authorized Facilities Management staff.
5. The requesting party is responsible for the following:
 - Adherence to OSHA rules governing roof safety
 - Use of personal fall protection equipment
 - Proper use of equipment

The need for proper use of fall protection equipment and accompaniment by a Facilities Management staff member cannot be overstated. Any violation could result in **SERIOUS INJURY** or **DEATH**, as well as fines from OSHA and indefinite loss of roof access privileges.

Facilities Management's Director of Safety and Risk Management shall provide OSHA certification training for SUU personnel on a semi-annual basis.
