

SCIENCE + HISTORY + ART

4TH GRADE NATIONAL PARKS PROJECT

Wednesday, November 11th @ South Elementary

2:00PM to 5:00PM

Guest speakers Paula Mitchell
and Dr. Jacqueline Grant

Join us for the first of three FREE hands-on workshops celebrating the National Parks Service Centennial.

This workshop will explore Zion National Park's history and the mammals that live there. You will also get to make your own piece of animal art, and will receive instructions & materials to teach the project to your students.

As a special bonus provided by the STEM Center at SUU, you will receive free Trace-a-Track animal track sets to use in your classroom!

By participating in the workshop you must agree to commit to teaching the workshop's integrated art project. Your students' resulting artwork will be documented for a chance to be displayed on Main Street's city banners in downtown Cedar City in the Fall of 2016.
