

## CETL Workshop 2.17 Experiential Education

### YOUR TURN

Take a concept or lesson you want to teach. Answer these questions (based on NSEE's good practice guidelines) to make it experiential.

1. What is your purpose and desired outcomes?
2. Are you prepared to teach? Are your students prepared to learn?
3. Can you be in an authentic setting? Can you make a real-world connection?
4. How and when will students reflect?
5. What orientation and training is needed to set students up for success?
6. How will students' learning be monitored? How will students refine what they are doing along the way?
7. How will you assess/evaluate the learning? (reflections can be a means)
8. How will you recognize and celebrate learning?
