

Electronics Technology Minor

2017-18 Catalog

Total Credits: Minimum 16

The electronics program offers a number of possible areas of study for a minor. For this reason there is not a specified program of study. Students wishing to minor in electronics must consult with EET faculty in that field to work out a program of study which will best suit the students' needs. Areas of study include general electronics, digital and computer electronics, communication, and servicing.

Students wishing to minor in Electronics Technology must meet with an EET faculty member to plan a course of study.
