

ONLINE

Early College Online (ECO) allows students to take entry-level university courses while still in high school. Credits earned through ECO count towards a GE Certificate, an Associate's Degree, or a Bachelor's Degree.

Flexible Schedule

Courses are online and asynchronous. You can do them anywhere and at your own pace. There are deadlines to help with pacing.

Save Money

These courses are provided at a reduced rate of just \$75 per credit. That means a 3-credit course, will cost \$225 USD plus any additional textbooks and/or course fees. This can help save a lot of money.

Accelerated Education

By taking university classes while still in high school, you can potentially shorten the time needed to complete a degree.

Explore Interests

The general education courses we provide help you explore a variety of subjects and help you develop a well-rounded understanding of the world beyond a specific major.

Gain Experience

Learn how to advocate for yourself, develop critical thinking skills, and practice good study habits while building connections with your teacher and classmates.

ON-CAMPUS

Participating in the On Campus Early College Program, you will take full SUU courses allowing you to work towards a US high school diploma while also working towards your SUU degree.

Since students are completing a high school diploma, there is a time restraint. Students will need to qualify and get approval from the ECO department.

In our On Campus program, you can live on campus (suu.edu/housing) or enjoy our HomeStay Housing Program where you may live with a local American family who share their culture in a place that feels like home.

Estimated Annual Cost

Cost Type	Amount
Tuition	\$22,060
