Specifications - Scope of Work

Specifications

We are looking to purchase one Nd:YAG pumped dye laser along with Nd:YAG pump laser (integrated if possible) for the SUU LaSE lab.

The Nd:YAG laser will need frequency doubling and tripling capabilities (532 nm and 355 nm) with powers of approximately 150 and 80 mJ/pulse respectively to pump a variety of dyes in the 400-800 nm range.

The dye laser will then require a tuning range from 400-800 nm along with frequency doubling capabilities to take those wavelengths into the UV. In addition, the dye laser will need a frequency resolution of $<0.2 \text{ cm}^{-1}$.

The LaSE lab does not have access to chilled water so an external chiller may be necessary for Nd:YAG lasers that do not have an internal water cooling reservoir.

Delivery:

- Please offer ETA on earliest Delivery
- All shipping and handling charges Must be included in the total
- We have a loading dock, forklifts, and manpower, to help unload most items

Please Note: SUU is tax exempt and non-profit. The winning vendor will be provided with a tax exemption certificate upon request.
