

BROOK HENDERSON

SUUSA SENATOR
HEALTH SCIENCES

My name is Brook Henderson, and I'm running to be your next College of Health Science Senator. I'm currently in SUU's Nursing Program, and I love SUU! With this next upcoming year being my last, I have reflected much on how SUU has been a special part of my growth as a student, employee, and a leader. It has provided not just opportunities for me to reach my goals but has also been an environment where I can grow and learn. I want to make sure that legacy of SUU continues for others! My main objectives for Health Science Senator are the following:

● OPPORTUNITIES

The College of Health Science has incredible programs that set SUU apart from other Universities. I want to make sure that continues and that students are connected to the resources they need to be successful. As your Health Science Senator, I will consistently work to identify common barriers that students often face when pursuing their majors. I will do this through one on one interactions with students and collaboration with members and presidents of clubs from each program. I also want to assist in connecting students to clubs or organizations that could benefit them on their career path.

● HEALTH

As a current Peer Mentor at SUU, I'm dedicated to being an advocate for mental health. I have a strong understanding of the many mental health resources SUU has to offer and often find a disconnect between those resources and the students. As the Health Science Senator, I'll continuously interact with students to help them learn about those resources and how to access them. I will also seek to gain an understanding of what resources would be the most helpful to students and advocate for those beneficial resources.

● UNITY

The College of Health Science is unique because each academic program has been in this new college for only 3 years! Even though our majors may seem different, they share a common commitment to help others live healthy lives. With that being said, my goal as your Health Science Senator is to help cultivate a culture of unity by working closely with the Faculty to promote interdisciplinary activities in efforts to encourage students in our college to learn from each other and be better equipped to enter the workforce.

THIS MARCH, VOTE HENDERSON FOR HEALTH SCIENCE SENATOR!
