

DANI NIKOLASHIN

SUUSA SENATOR BUSINESS

My name is Dani Nikolashin, and I am running to be your next School of Business Senator. I am currently a junior in the School of Business here at SUU. My mission is to create connections for and with students that will support them in all future professional endeavors. Through my leadership experience with SUU's Business Council and Student Management Association, I have gained valuable tools and experiences that will support me in my representation of SUU's Business School. My focus is on students, and I value student voices in all actions within the University. To fulfill my mission, I will implement these objectives:

- Expand student connections and opportunities.
 - I have worked closely with the other business representatives this year to create new and engaging connections for business students. To expand these opportunities, I look to work on with our faculty and staff, along with our representatives to create events and programs that will create invaluable connections between those within and outside of the university.
- Grow student's professional experience.
 - I seek to immerse business students in an environment that they are presented with a plethora of options to grow their professional experience. I strive to have the business school be a comfortable place for business students to seek professional opportunities. I plan to work with the school's team that manages careers and employment outreach to create this environment.
- Create greater access to leadership and involvement.
 - In my experience in leadership, I have gained valuable knowledge that I will be able to implement in the future. I seek to grow the accessibility of these leadership and involvement opportunities to all business students. I look to work with the business council, faculty, and staff to inspire and create this access.

I have spent this last school year representing SUU's management students and am ready to represent all business students as your next Business Senator.
