

# JUNI TIMMINS

## COLLEGE OF HEALTH SCIENCES SENATOR

My name is Juni Timmins. I am a Junior studying Exercise Science with a minor in Dance. I am also a Global Ambassador here at SUU, being a part of the GLAM squad has driven my passion for making community. I love SUU and I want to make it a better school in every way I can. My career goal is to become an Occupational Therapist, this is because I have a passion for helping others succeed. Being able to run as the Senator for the College of Health Science gives me the opportunity to serve my fellow students to reach their goals, and I am eager to have this opportunity to make a change for our College.

My main goal is to expand the network of opportunities for students within the College of Health Sciences, similar to the strong career-building opportunities offered by the business school. I'm passionate about creating pathways for students to engage with industry professionals and explore real-world careers.

In addition to the potential speaker series, I want to try and amplify extracurricular activities like HOSA, and other health-related clubs. As someone who competed and went to internationals for HOSA I know that these clubs provide a strong foundation for students to build professional skills, but I also see the potential for these organizations to go further. My goal is to get more students involved—whether it's through extracurriculars or the promise of better job readiness. I want to bring students the resources and skills necessary to stand out, and make sure that these clubs don't just look good on a resume but actively prepare you for the workforce. Students shouldn't just participate—they should walk away with real experiences and connections that will help launch their careers.

As a candidate, I believe we can bridge the gap between the classroom and the workforce through better networking. I'm committed to help in providing tangible opportunities for students to apply what they've learned and step into their careers. Let's build a stronger, more connected community within the College of Health Sciences and ensure that when you graduate, you have the experience, knowledge, and network to succeed. I would love to be your voice as Senator for the College of Health Sciences!
