

ANDREW WILKS

COLLEGE OF ENGINEERING AND COMPUTATIONAL SCIENCES SENATOR

Student government is not about the elected leaders, it's about the individuals who need to see a change but don't know where to start. That is where I come in.

My name is Andrew Wilks. I am a sophomore studying Computer Science, and I want to be your senator for the College of Engineering and Computational Science.

For experience, this school year, I have been a part of many organizations such as the Student Programming Board and the Student Athletic Board. Through these organizations, I have had the privilege of getting to know you, the students of SUU. I have learned the power of not just connecting with a group of people, but connecting with the individual. My time as a student advocate has narrowed my focus on service and guidance for the individual students that do, do not, or can not reach out for help.

A vote for me is a vote for your voice to be heard, your ideas to be explored, and your plans to be executed. I want to help you, the students of SUU, because SUU has helped me mold into the leader, the example, and the man I am today.

My purpose for being your senator is to improve our college in these and more ways:

- **Advocating for the process of getting involved on campus to be easier, clearer, and more efficient.**
- **Advocating for more events on campus for our college to better connect to SUU.**

I pledge to you, the Students of SUU, I will serve you with all my power, and speak not with my words, but yours. T-Birds, Vote Andrew Wilks for the College of Engineering and Computational Science Senator.
