

DAVI KAUWELOA

ACADEMICS VICE PRESIDENT

If you could change anything about SUU what would it be? As VP of Academics, I would make it my top priority to listen to what you have to say and strive to bring about great change for the benefit of the student body.

SUU has given me much in opportunities and experiences and I would hope the same for you. I want to help you curate the college experience that YOU want and deserve at SUU. Unlike many other universities, we are fortunate enough to have many peer-mentoring programs to support students across campus. I will work with these organizations to ensure that every student has a peer mentor that they can trust and go to for help. I want students to feel confident in their career choice and have a goal to create more college-specific career fairs that allow you to network with individuals from various fields of study.

Another one of my goals as VP of Academics is to team up with on-campus organizations to promote mental health awareness. Whether we dedicate, a day, a week, or a month to this cause, I want you to know about the resources that are available for you, all year long, including me. If you are struggling with something, come in and chat with me. I want to hear from you and want to know how I, and SUU can help.

As a nursing major, one of the many things I am passionate about is simply being able to provide care to those that truly need it—regardless of where someone comes from, what insurance they have, etc.. With that being said, I will continue to push for the establishment of an on-campus health clinic to ensure that while you're at SUU, you don't have to worry about this.

One of my favorite things about SUU is the great sense of community that is fostered here. As VP of Academics, I will stand as a point of contact to help students get connected to campus. I hope to create more opportunities for students to get involved and aware of things happening on campus. I will encourage departmental representation to find empowering and equitable solutions for many of our current issues. There's a place for everyone at SUU and your voice will be heard.

If you have more ideas on how we can better the university, I would love to hear them. I hope that the years you spend here are some of the best. SUU is better with you here!!
