

KRISHNA SHAH

COLLEGE OF ENGINEERING + COMPUTATIONAL SCIENCES SENATOR

My name is Krishna Shah. Although it's my first year at SUU I've eagerly pursued any opportunity to become more involved on Campus. This year I was presented with the opportunity to become an Involvement Captain inside the Student Leadership and Involvement Center. I want to encourage other students to find their passions and help make a difference. I'm excited to take on any chance to help out, like organizing events or joining clubs, to create a welcoming community where everyone can grow together.

Being an Involvement Captain showed me how important it is for every student to get involved on campus and help others in discovering their niche in college. Being a student in the College of Computational Sciences and Engineering I've noticed that in our college there aren't many chances to socialize and make new connections. As a member of our college, I'm dedicated to fixing this problem by implementing new ways in which we can increase socialization. I want to make our college a friendlier place where students can meet and get to know each other. I'll start by creating social clubs and organizing events where people network and make connections. I believe that making these changes will make our college experience better and help us feel like we're part of a community.

To implement this I want to:

1. Create events for our students to socialize & network
2. Be accessible to those interested in joining clubs.
3. Create designated social spaces within the college where students can gather, study, and interact with each other.
4. Implement mentorship programs where upperclassmen or alumni mentor younger students.
