

- I. **Call to Order - Colton**
 - II. **Roll Call - Cat**
 - A. All in attendance except Business Senator Matthew Matheson
- Approve Minutes from last meeting approved**
- III. **Old Business**
 - A. **Veteran Priority Registration**
 1. SUUSA S.R. 001: Resolution: Supporting Veterans and Dependents Receiving Priority Registration Privileges (accessible on SUUSA website)
 2. **Debate:**
 - a) Sen. Cox-what research was done to support this bill? Rep. Oschner-all previous research was already presented to the student body senate
 - b) Rep. Moore-the resolution talks about spouses and them registering early. What does this entail? TO-it is meant for dependents (those who receive GI Bill benefits) AM-how does that relate to spouses needing to register early as well? TO-the bill has a lot of emphasis on veterans but the veterans center deals with others who get veteran benefits.
 - c) Sen. Cox- It says that an autonomous banner script will be created to initiate priority access for registration. Why does the Veterans Center employees need banner access if the system is autonomous? Rep. Oschner- For the current process of implementation, the current banner script can be written but the time it'll take from right now to the completion of the script being written to full autonomy, it'll take a long time (up to six months). So from now, to the time the script will be written, the full-time staff will be granted banner access to fulfill the requests. CC-Is that something the advisors can do? TO-Yes
 - d) Allison Moore-were other possibilities explored in committee? CC-no other possibilities were explored
 - e) **Call to Question:** in favor: 10, against: 3, abstentions: 3
 - (1) **Motion fails to pass**
 - B. **Canvas Pronouns**
 1. SUUSA S.B 001: Bill: Promoting Canvas Pronouns Settings (accessible on SUUSA website)
 2. Debate: none
 3. **Call to Question:** All Yay
 - a) **Motion Passes, moved to Nouman Kante for signing**
 - IV. **New Business**
 - A. **Women's Center**
 1. Sen. Walton-Wishes to add an additional center outside of Title IX and CAPS. Another resource on campus for students to drop in and ask questions about things they're experiencing, processes, education on sexual assault, trauma reactions, etc.
 2. Sen. LaFevre-We used to have a women's center, but they got rid of it. Do we know why? AW-Not sure why, but it was taken away 6 years ago.
 3. Rep. Paz-is this the same thing as the health center proposition? AW-no, they could share resources, but they wouldn't be the same
 4. Rep. Barton-how is this going to be different from Title IX and where would it be housed? AW-It would be involved with the Health and Wellness Center; the space is already there and they have resources we could share. Title IX coordinator needs to remain impartial and can't persuade anyone to do one thing or the other, they're only there to offer information, and Title IX is also scary and most people who have been a victim won't reach out to Title IX. So by having another resource that would make it less scary.

SOUTHERN UTAH UNIVERSITY STUDENT ASSOCIATION

5. Rep. Moore-what kind of resources would we need for the Center? AW-ideally, therapists, Peer Allies (through CAPS) that act as student counselors that have been taught by CAPS
6. Sen. Burnside Evans- Would it be focused on a women's crisis center or open to everyone on campus? AW-specific resources for survivors, wouldn't be just for women, it would be open to everyone
7. CS Stewart-consider calling it something else so those who don't identify as a woman would be open to using the service. Also, have there been considerations made of the legal repercussions? AW- We would work with Title IX to make sure everything would be legal and confidential
8. Rep. Hawk-there is a local shelter (Canyon Creek Services) and it could be beneficial to work with them on this and use their advocates and incorporate them into the Center
9. Rep. Moore-she imagines some type of collaboration with all these different organizations and it would be awesome to collaborate with each organization
10. VP Academics Jacobsen-even though she can't vote, she suggests moving it to committee to clarify everything needed to make the resolution

11. Motion to Move to Committee

a) Motion passes

B. Investigation on Proctorio Alternatives

1. Sen. LaFevre-It's taxing and a lot of work, and others have stated that because of its invasiveness (tracking eye movements, etc). She's received complaints about the program, so she wanted to look into possible alternatives
2. Rep. Hawk-could the alternative be making sure professors or TAs analyze each infraction to see if the infraction was legitimate?
3. Sen. Burnside Evans-agrees with Rep. Hawk, but would love to look into another option
4. Rep. Paz- find a way that Proctorio could work best for each individual class (work with professors/TAs)
5. Rep. Barton- there are a lot of disabilities members who receive infractions for movements or noises they cannot help
6. Rep. Moore-we should look into ways to possibly change the software, so it's not as sensitive so not so many people get flagged
7. Rep. Paz-set a group of guidelines, if flagged, not an automatic zero or points docked off, but a notice for the grader to check the video
8. Rep. Moore-concerned about the time it would take. Having something straight forward would be easier
9. Sen. Cox-question for VP of Clubs Dakota Colby since he's a TA: what kind of time do you have as a TA DC-he's capped at 20 hours a week, but his duties include grading so there is no way he can look over 25+ hour long videos.
10. CS Stewart- could the alternative be using zoom? The TA could look over the testing session
11. Rep. Hawk- maybe the only section of video needed to watch would be the 10 seconds or less that the video flagged
12. Sen. LaFevre-having TAs/professors review it is a great idea, but the major concern is the tracking software on the program
13. Sen. Oschner-how invasive is it? Sen. LaFevre-it requires you to scan an ID, tracks eye movements and hand movements, and tracks the sounds and video and the screen. DC-it tracks open tabs, anything running on your computer, and anywhere your mouse goes. CS-it also tracks the location of where you take the exam

14. Motion to Move to Committee

a) Motion Passes
